

Welcome to Experimentrix!

Attached are instructions to sign up for psychology experiments for credit in this class. Please pay close attention to the instructions; particularly to the deadlines.

If you have not participated in experiments through Experimentrix in the past, it works like this:

- 1) Register as a user (please see instructions on the next page)
- 2) Sign up for the experiments.
- 3) Complete the Experiment.
- 4) Go back in to the Experimentrix system and assign your credits to the class(es) of your choice. (You must be currently enrolled for the course to assign credits to it.)

******Please note, the last day you can assign your credits is the last day of class. If you have not assigned your credits by the last day of class you will not receive credit!***

Also, if you are not yet 18 years of age and would like to participate you may be able to have your parent or guardian sign a consent form. Not all experiments will allow this, but if you wish to participate in one that does please see me in Ames Hall 204 for the form.

Please feel free to contact me via email at hope.stein@jhu.edu for any questions or concerns that you may have.

-Hope Stein

Psychology Research Participation

If you choose to participate in psychology experiments for extra credit, you are strongly urged to do so well before the end of the semester. If you wait until the last 2 or 3 weeks of the semester, there is a good chance that you will not be able to find available experiments to sign up for.

If you registered last semester, your Username and Password are still valid.

If you are a New User, follow the instructions at the bottom of this page to register with Experimetrix before attempting to sign-up for experiments.

1. Go to www.experimetrix.com/jhu and click on **sign.up** to sign up for experiments.
2. You can change your password or modify your profile by clicking on **log.in** from the www.experimetrix.com/jhu page.
3. Once you have completed your participation in psychology experiments for the semester, you must distribute your research participation credits to the Psychology course(s) you are taking. To do this, first
 - (a) click on **log.in** from www.experimetrix.com/jhu
 - (b) click on "edit your course selection" to specify all the eligible Psychology courses for which you are currently enrolled.
 - (c) click on "assign credits to your courses".

*****If you do not complete this step by the last day of classes ***
you will not receive proper credit!**
4. Note that in order to earn extra credit for two or more courses, you must complete the sum of the necessary research participation credits specified for each course. In other words, each research participation credit can count toward only one course.

New User:

1. Go to www.experimetrix.com/jhu using your web browser.
2. Click on **new.user**
3. Enter your name, JCard number (the bold one), and email address to register.
****Make sure you type your email address accurately!****

If you have a JHU email address but prefer to use a different email address for notices and reminders, use your JHU address to register; you can specify a secondary email address to which notices and reminders are sent by editing your profile (see step 2 above).

If you do not have an email address that ends in "jhu.edu" (e.g., smith@jhu.edu or jones@jhunix.hcf.jhu.edu), then you will need to contact the Webmaster via the link on the webpage to register; send your name, the psychology course(s) in which you are enrolled, J card number, social security number and your email address. This is a security precaution to ensure that only JHU students can sign up for experiments. **DO NOT** make up an email address, use an existing one

4. A password will be e-mailed to you. To activate your account, you must either sign up for an experiment or log in to the system within **three days** of receiving your password.
