Interested?

We are looking for children of many ages to participate!

Children find our studies fun and interesting, and so do their parents!

If you would like to learn more, please give us a call, send us an e-mail or mail back this brochure.

Infant and Child Scientists Needed!

THE LABORATORY FOR CHILD DEVELOPMENT
Johns Hopkins University
Department of Psychological & Brain Sciences
151 Ames Hall
3400 North Charles Street
Baltimore, MD 21218

(410) 516-6068
infant.research@jhu.edu
At the Johns Hopkins Laboratory for Child Development, we study how children perceive and reason about the world around them.

Our studies have shown that children know much more than people once thought. We study topics such as how infants and children track objects, learn new words, and understand number.

Can your child spare a few minutes?
Our studies involve only one visit and most sessions last less than 40 minutes. You will be with your child at all times.

Children watch events taking place on a puppet stage, listen to speech sounds, play with toys, or play a hide and seek game.

Your child will receive a small thank-you gift for participating!

We are located on the Johns Hopkins Homewood campus and parking is free for participating families.
